

## GL-CORE S CP

LOCATE DISTRIBUTOR

### Product Description

GL-Core S was specifically designed for one of the best Israeli Counter-Terrorism units as a primary buttstock. The GL-Core S CP optional upgrade version includes the GL-Core S stock and the GCCP Cheek Rest, designed to support the use of different optics

and holographic sights. The design process started with the GL-Core buttstock, and implemented all the design changes that were requested to create a buttstock that will be short and compact for CQB scenarios but will still provide strength and stability for mid-range engagements.

## **Product Advantages**

- Small and compact allowing for easy maneuverability during CQB
- Flat faced rubberized butt-pad designed for use with and without tactical body armor
- Interchangeable buffer tube adapters for a tight fit on Mil-Spec and Commercial buffer tubes
- GCCP version - Three positions
- Cheek Rest No protruding parts, will not get caught on gear or webbing
- Inversed positioning lever will not open accidentally
- Two integrated Quick Detach (QD) rear sling swivel connectors for the SLS sling attachments
- Made of durable and light-weight fiberglass reinforced polymer composite

## **Compatibility**

- AK, VZ and shotgun platforms, on the AR platform, the CP may obstruct the use of the charging handle when the buttstock is fully collapsed, for use with an AR platform, we recommend removing the CP

## **Specifications**

Length	165 mm
Width	55 mm
Height	131 mm
Height deployed	149 mm
Weight	338 gr
