

KPOS Scout SL

Pistol Conversion Kit with Slingshot Arm Brace for Glock® 17/19

LOCATE DISTRIBUTOR

Product Description

The Slingshot Handgun Brace is built to enhance control and precision on the KPOS Scout conversion kit. It lets the shooter operate the firearm one-handed with the dominant hand, without needing a support hand or shouldering the firearm. The brace is simple by design: lower it onto the forearm and it opens to grip and support a wide area, giving stable, immediate contact with no setup fuss. The KPOS Scout chassis pairs a rigid 6061 T6 aluminum upper with a lightweight polymer lower - compact, durable, and accurate. The upper features a full-length integrated 1913 MIL-STD Picatinny rail for optics and accessory mounting.

Product Advantages

- Slingshot Handgun Brace enables true one-handed operation and control
- Hybrid aluminum/polymer build – lightweight, compact, and easy to conceal
- Installs in minutes with no gunsmithing and no permanent modification to the handgun
- Snap-lock single-button assembly – quick, secure, repeatable
- Ambidextrous M4-style charging handle
- Full-length 1913 MIL-STD Picatinny rail upper, plus a polymer lower rail and two removable side rails with integrated thumb rests
- FGG-Safe angled grip folds flat and includes an extendable trigger guard
- Hard-anodized 6061 T6 aluminum upper; reinforced polymer lower
- Includes bungee single-point sling, SLS quick-detach sling swivel, side rails, and FGG-Safe angled grip
- Limited lifetime warranty

Compatibility

- Glock models G17, G19, G19X, G22, G23, G25, G31, G32, G45 / Gen 3 – 5 including 'C' Models, without a backstrap grip add-on.
- Sig P365-XMacro models (Using the XMacro OEM polymer Grip Module only)

Specifications
