

RAPS C

Rapid Adjustment Precision Stock- Collapsible

LOCATE DISTRIBUTOR

Product Description

The Rapid Adjustable Precision Stock (RAPS-C) is specifically designed for professional precision shooters. It incorporates many features found in the standard RAPS, including an integrated cheek

rest, adjustable length of pull (LOP), a wide range of adjustments, one-handed operation, and a memory function. All these features are packaged in a more compact and lightweight design that is compatible with the standard carbine buffer tube.

Product Advantages

- Two levels of adjustable Length Of Pull (LOP)- buffer tube and micro adjustment with the RAPS system
- Integrated Cheek Rest
- Patent-pending 1 Latch System locks both RAPS LOP and Cheek Rest height with one lever; can be configured for right or left-hand shooters
- RAPS LOP memory feature; set it once and the adjustable butt-pad will spring out to the same length every time
- RAPS LOP Adjustment Range extension: 32mm (1.26")
- Integrated Cheek Rest, adjustment range; 42mm (1.65")
- Concealed Picatinny rail at the bottom of the stock for use with a monopod
- Heavy-duty, rubber butt-pad with height adjustment
- The RAPS-C includes a retention bolt, for determining optimal fit on MIL-Spec or Commercial-Spec Carbine buffer tubes
- Easy installation, no gunsmith required

Compatibility

- MIL-Spec or Commercial-Spec Carbine buffer tubes
